

Glendale Needs You!

For the past several weeks, the Village of Glendale's Health Committee has been meeting with Hamilton County General Health District to develop our own plan in the event of a large-scale public health emergency (Anthrax). This plan is being initiated and monitored by the Centers for Disease Control and Prevention (CDC) through the Dept. of Health and Human Services. At this time, we need to identify a number of volunteers to help organize and distribute medicines and medical supplies in the event of such emergency.

We are now recruiting volunteers for Glendale's Cities Readiness Initiative Plan.

In some cases medically trained volunteers are preferred, ***but all types of volunteers are needed!*** Volunteers and their immediate families will benefit by receiving medications first, prior to the village mass distribution.

Please email your name, address, phone number to white@glendaleohio.org and let us know about yourself and how you can help. If you have a medical background, be sure to let us know. Our committee will then contact you on the specific role you can help with in administering our plan.

Thank you!
